

7818

HIGH TEMPERATURE GREASE

Chemico 7818 is a multi-use barrier coating that can withstand temperatures up to 325° Fahrenheit, when placed on vertical surfaces this product will not sag. 7818 reduces airborne particulates and is very visible with its' red color. This product is especially useful in hard to reach areas that collect dirt that could become air borne, because of its' staying power.

PRODUCT APPLICATION

- Use in high temperature areas where other booth greases will sag or smoke.
- Use under conveyors or other hard to reach areas in clean rooms.
