

CG2000

TEMPORARY SCRATCH PROTECTION

Chemico CG2000 will greatly reduce chips and scratches when manufacturing a part or vehicle. This product gets rolled on after the paint is inspected and then it dries forming a hard shell. It protects against mutilation during production and it is easily removed in the car wash or leak detection booth. This product will save you from costly repairs and increase your First Time through Quality.

PRODUCT APPLICATION

- Increase FTQ by protecting the part or vehicle from chips and scratches that can occur during production.

TECHNICAL DATA

- Physical State: Liquid
- Color: White Opaque
- Odor: Characteristic Odour Latex
- Specific Gravity (H₂O=1.00): 1.04
- Typical pH: 8.5

DIRECTIONS FOR USE

Use CG2000 after the part or vehicle is painted, inspected, and dry to the touch. Roll or spray CG2000 on the areas you want to protect from chips and scratches throughout the production process. Once the vehicle is completed wash the product off in the car wash or leak detection booth. .

SAFETY

Contact your Chemico representative for additional product information and always review the Safety Data Sheets (SDS) before using this or any Chemico product.
