

3200 RTU

RUST INHIBITOR

Chemico 3200 RTU is a Ready-To-Use rust preventative that does not cause craters in the paint shop. This product has been tested by PPG, BASF, Henkel, and Axalta and is widely used in paint shops that demand exceptional quality. Chemico 3200 RTU provides short-term protection against rust and when it dries there is no oily residue left behind so the parts will be dry to the touch. This is a very economical solution for coating production aids before the painting process.

PRODUCT APPLICATION

- Economical solution for in-process protection of ferrous parts
- Dry to the touch
- Ready-to-Use (RTU) – no dilution required

TECHNICAL DATA

- Physical State: Liquid
- Color: Clear, colorless liquid
- Odor: Mild
- Specific Gravity (H₂O=1.00): 1.035
- Typical pH: 9-10
- Boiling Point: ~ 212°F

DIRECTIONS FOR USE

Chemico 3200 RTU is designed for ambient immersion or gentle heated (120°F) coating of metal parts. Allow to air dry before stacking or packaging.

Chemico 3200 RTU can also be sprayed onto parts if proper ventilation or protection is used to prevent inhalation or contact with skin, eyes, and mouth.

SAFETY

Contact your Chemico representative for additional product information and always review the Safety Data Sheets (SDS) before using this or any Chemico product.
