

2000 HIGHLIGHT OIL

Chemico 2000 Highlight Oil will help you determine if you have defects in your metal before the next process -- saving you time and money. You can determine if the part needs to be buffed or scraped before adding more cost and increasing any further loss.

PRODUCT APPLICATION

- Check the surface of rolled steel
- Use on formed part

TECHNICAL DATA

- Physical State: Liquid
- Color: Light Yellow
- Odor: Slight
- Specific Gravity (H₂O=1.00): ND
- Typical pH: ND

DIRECTIONS FOR USE

Spray or wipe Chemico 2000 on to the surface and check for defects.

SAFETY

Contact your Chemico representative for additional product information and always review the Safety Data Sheets (SDS) before using this or any Chemico product.

2110 WAX STRIPPER

Chemico 2110 is a quick and easy way to cut through layers of old floor finish whether it is a carnauba wax, cross-linked polymer or a water-based sealer. Simply mop on 2110 over old wax and watch it work. Soon you will see a floor clean enough to refinish with no rinsing necessary.

PRODUCT APPLICATION

- Remove wax carnauba and microcrystalline
- Use to take off sealer's acrylic and water-based urethanes
- Strip off metal cross linked polymers and styrene finishes

TECHNICAL DATA

- Physical State: Liquid
- Color: Colorless
- Odor: Mild
- Specific Gravity (H₂O=1.00): 1.027
- Typical pH: 12.75

DIRECTIONS FOR USE

Regular stripping: 13 oz. per gallon of hot water.
Heavy duty stripping: 26 oz. per gallon of hot water.

- Saturate Surface with Chemico 2110
- Heavy Duty Stripping - use a black stripping pad with a floor machine
- Mop up emulsified wax or use wet/dry vacuum for best results
- Allow floor to dry
- Apply new floor finish
